

MARKETING STRATEGY · WORKING FRAMEWORK

Customer Segmentation for Marketing

A practical route from audience data to sharper campaigns

Made with GAMMA

THE STARTING POINT

One audience is not one customer

The project needs a sharper view of who buys, why they buy, and what message moves them.

Made with GAMMA

01 · PURPOSE

Start with the decisions segmentation must improve

01

Attention

Which customers deserve the most attention?

02

Problem

What problem should each campaign lead with?

03

Activation

Which channels and offers fit each group?

Made with GAMMA

02 · INPUTS

Build segments from four useful signals

Who they are

Firmographic or demographic context.

What they do

Behaviors, usage, and purchase patterns.

What they need

Jobs, pain points, and desired outcomes.

Where they are

Lifecycle stage, market, or account context.

Made with GAMMA

Five practical segments to test first

High-value loyal

Deep relationship

New customers

Habits forming

Price-sensitive

Promotion-led

At-risk

Engagement declining

Low-awareness prospects

Need is present

Made with GAMMA

04 · PRIORITIZATION

Prioritize segments by value and reachability

Compare potential value, urgency of need, size, competitive pressure, and the project's ability to reach and serve each group.

SEGMENT	POTENTIAL VALUE	URGENCY	REACHABILITY	PRIORITY
High-value loyal	High	Medium	High	Test first
New customers	Medium	High	High	Test first
Price-sensitive	Medium	Medium	Medium	Test next
At-risk	High	High	Medium	Test first
Low-awareness prospects	High	Medium	Low	Validate first

Made with GAMMA

05 · TRANSLATION

Turn each segment into a campaign promise

Loyal customers

Reward depth of relationship and invite advocacy.

New customers

Make the next successful action obvious.

At-risk customers

Remove friction and restore confidence.

Low-awareness prospects

Connect the problem to a clear outcome.

Made with GAMMA

06 · VALIDATION LOOP

Test the message before scaling the spend

01

Write

One promise and one proof point per segment.

02

Run

Small tests across the most relevant channels.

03

Compare

Response quality, not just volume.

04

Refine

Refine the segments and repeat.

A segment is useful when it changes what marketing does next.

Made with GAMMA

07 · THE HANDOFF

Leave marketing with a repeatable playbook

Shared definition

A shared definition for each priority segment.

Ranked audiences

A ranked list of audiences to target first.

Campaign hypotheses

A message, offer, and channel hypothesis for each.

Testing rhythm

A testing rhythm that keeps the segments current.
